

Sprint 3 Report

Product Name: Stockalyzer

Team Name: Stockers

Date: 3/4/18

Actions to stop doing: We should stop being distracted during meetings and clear up miscommunications in Slack. One member being distracted takes away from team productivity and is not fair to the team as a whole. To help remove the possibility of being distracted the team should take more breaks, in order to have a better mentality going through the group sessions.

Actions to start doing: The team should start posting more important links in Slack, so we have a reference point when we start coding for the project. Also we should make sure to have a clear coding standard for when we code, so that everything we write is legible and easy to read.

Actions to keep doing: The team needs to continue meeting every once in a while for coding sessions outside of scrum meetings, as these are very helpful with clearing up misconceptions, finding bugs faster, along with making bigger decisions on specific ways we want our application to work. We should also continue to keep our scrum meetings strictly timeboxed, as this helps us focus on the tasks at hand and not get distracted by minor issues that don't involve anyone. This helps save the group members time, which in turn increases group moral as a whole.

Work completed/not completed:

User stories completed:

- As a stock trader, I want to see the trends for a given stock.
- As a user, I want to be able to use in depth graphics that are neat and helpful.
- As a curious user, I would like to also be able to see current information and trends in cryptocurrency.

User stories not completed:

All user stories completed.

Work completion rate:

Total Number of User Stories Completed: 3

Total Number of Estimated Work Hours Completed: 11.5

Total Number of Days: 14

User Stories a Day: .43 u.s./day

Ideal Work Hours a Day: .82 hours/day
