Sprint 4 Report
Product Name: Stockalyzer
Team Name: Stockers
Date: 3/12/18

Actions to stop doing:

We should, prior to the scrum meeting, have a pseudo plan of what we are going to say and keep it limited to generalities. Aside from that, we still strive to limit amount of distraction during meetings and coding sessions.

Actions to start doing:

We should start having additional coding sessions for working on the code as a group. It would lessen the time between confusions and clarification. It also would help solving problems quicker with all members pooling insight together rather than everyone working semi-independently on problems.

Actions to keep doing:

Our communication, despite latency of message response, was still on point. Questions and concerns were answered timely.

Work completed/ not completed:
User stories completed:
- As a curious user I would like to be able to see current information and trends in cryptocurrency.
- As a user, I want to use a web app that looks aesthetically pleasing.
User stories not completed:
- All user stories were completed.

Work completion rate:
Total Number of User Stories Completed: 2
Total Number of Estimated Work Hours Completed: 9.75
Total Number of Days: 10
User Stories a Day: 0.2
Ideal Work Hours a Day: .975
