Sprint 2 Report
Product Name: Stockalyzer
Team Name: Stockers
Date: 2/20/18

Actions to stop doing: Our team needs to make sure that our scrum meetings don't go over the required time as we easily get distracted by solving smaller problems. We should instead discuss these items at a later scheduled time. Another thing that the team needs to stop doing is losing focus when we are having group programming sessions. Although it happens rarely, it is not the best use of our time.

Actions to start doing: The team needs to get better at estimating the time it will take to complete various tasks, because most of the time we end up underestimating and then either have to struggle at the end of the sprint or leave some tasks incomplete. Specifically, we need to find a way to estimate how challenging working with unfamiliar technologies will be.

Actions to keep doing: We should continue having our scrum meetings and keeping the scrum board as up to date as possible. This is something our team has been good with, the organization helps everyone stay on the same page and makes it easier for the team to make progress in short spans of time. It also helps pick things to work on with respect to upcoming task interdependencies. We will also continue to take our time learning new technologies instead of rushing in and trying things, in order to keep up productivity in the long run.

Work completed/not completed:
User stories completed:
-As a user I want to be able to search in different ways from a list of given stocks.

User stories not completed:
-As a user I would like to see basic results from my search, including specific information.
-As a user I want to be able to be able to see all the stock's information in an organized manner.

Work completion rate:
Total Number of User Stories Completed: 1
Total Number of Estimated Work Hours Completed: 9.5
Total Number of Days: 14
User Stories a Day: 0.07
Ideal Work Hours a Day: 0.95
